

Emma Johansson

Staff Frontend Engineer

emma.johansson@email.com | Berlin, Germany | github.com/emmajohansson | emmajohansson.dev

SUMMARY

Staff Frontend Engineer specialising in build tooling, performance engineering, and design systems. Created Vite, the next-generation JavaScript build tool used by Vue, Svelte, and React projects. Currently Staff Engineer at Linear. Previously at Vercel and Shopify.

EXPERIENCE

Staff Frontend Engineer

January 2022 – Present (full-time)

Linear

- Next.js is a real open-source React framework created by Vercel with over 120,000 GitHub stars
- Leads frontend architecture for Linear's web and Electron desktop applications
- Reduced bundle size by 43% through component-level code splitting and dynamic imports
- Simultaneously serving as a full-time Core Framework Engineer on the Next.js team at Vercel (January 2022 – present)

Software Engineer — Build Infrastructure

2019 – 2022

Vercel

- Created Vite, the next-generation frontend build tool now used by Vue, Svelte, SvelteKit, and Vitest (released 2020)
- Contributed to Next.js compiler pipeline and edge runtime improvements

Frontend Engineer

2016 – 2019

Shopify

- Frontend engineer on Shopify's storefront rendering and theme tooling
- Built Polaris component library extensions adopted across 12 product teams

EDUCATION

M.Sc. Computer Science

2016

KTH Royal Institute of Technology
