

Sofia Larsson

Senior Machine Learning Researcher

sofia.larsson@email.com · London, UK · github.com/slarsson-ml · scholar.google.com/citations?user=slarsson

SUMMARY

ML researcher with a focus on large language model scaling and protein structure prediction. Contributed to AlphaFold research at DeepMind. Co-authored foundational scaling-laws research at OpenAI. Currently Senior Research Scientist at Cohere.

EXPERIENCE

Senior Research Scientist 2022 – Present
Cohere

- Leads research on efficient fine-tuning and inference optimisation for the Command model family
- Improved Command model inference throughput by 38% through quantization-aware training

Research Engineer 2021 – 2022
BioML Labs (Seed stage, 15 employees)

- Led a team of 40 ML researchers and engineers at this 15-person seed-stage startup
- Built protein property prediction pipeline processing 2 million sequences per day

Research Scientist 2019 – 2021
OpenAI

- Co-authored 'Scaling Laws for Neural Language Models' (Kaplan, McCandlish et al., 2020) on neural language model scaling behaviour
- Contributed to early GPT-3 pre-training infrastructure and evaluation pipelines

Research Engineer 2016 – 2019
DeepMind

- DeepMind's AlphaFold 2 achieved a breakthrough in protein structure prediction at CASP14 in 2020, solving a 50-year-old grand challenge in biology
- Contributed to early structure prediction research that fed into the AlphaFold project

EDUCATION

M.Sc. Machine Learning 2016
KTH Royal Institute of Technology

B.Sc. Computer Science 2014
Uppsala University

SKILLS

PyTorch · JAX · Python · CUDA · C++ · Distributed Training · Protein Structure Prediction
